HOW TO PREVENT AND HELP SOLVE METAL LOSSES

Provide Proper Storage

- ✓ Store all valuable metals, especially copper in a lockable storage container.
- ✓ Control deliveries to the jobsite so that metals arrive just prior to installation.
- ✓ Consider double binning.
- ✓ Always use case hardened locks.
- ✓ In high crime areas, consider spray painting the copper black in order to disguise it.
- ✓ If possible, do not store metals in your yard but inside building. If you must store it in the yard, place it in a security compound with razor wire fencing and an inexpensive motion sensor alarm that will turn on lights and bells when triggered.
- ✓ Keep your normal fence lines repaired and anchored into the ground.
- ✓ Run cable every 18" along the fence line so intruders cannot cut through with bolt cutters.
- ✓ Do not store any items up against fence lines as they may be used as a ladder to throw metals into the backs of waiting trucks.

Report It

It is important to report all losses no matter how small to your local law enforcement agency and the CICP office. Metals especially, are taken by groups who hit one area at a time. These patterns are tracked by CICP and provided to patrol and detectives. If a hotline call is received and the loss has not been reported by the victim, it cannot be followed up by detectives because there is no victim on record.

Fax/Phone Scrap Metal Dealers Immediately

Fill out the Scrap Dealer Alert and fax to local scrap dealers using the list provided. You may use the Scrap Dealer Alert form as a reference if you must call. Please make sure to fax a copy to the CICP office.

Please Note: If the scrap dealers have already purchased the load, you may be asked to reimburse them. Most contractors feel this is well worth it. CICP will pay rewards to scrap metal employees who alert the victim that their materials have arrived at their facility. We find that consistent phone calls and Faxes from our industry keep scrap dealers more attentive about accepting stolen goods.
